

BRUNERS IN POLITICS.

Eight honest members of the San Francisco Grand Jury have asked to be released from further official duty because the Foreman of the Jury is a hoodler and his hoodler associates refuse in the face of the most positive evidence to indict a rascal named Elwood Bruner, who was a member of the last legislature and who fattened off bribery and corruption during the entire session.

Bruner will never see the inside of the penitentiary because the numerous interests behind him will see that he is protected.

The most available material for the skillful performance of dirty work in a legislature is a lawyer who has no conscience and is a good all round rascal.

In every legislature there is always a man backed by big interests to do work of such a character that the man doing it sees the penitentiary yawning in front every step of the way.

After a man has once secured the job of doing this sort of work, he can always depend on the unqualified support of his masters socially, politically and every other way.

He can command their backing at all times as the secrets he possesses places them in his power.

The penalty of wealthy men hiring rascals to do their dirty work is that the masters soon have to take a back seat and become the slaves of their accessories in crime. Conscious of his position the man whom every body knows and despises shoves himself into all sorts of responsible positions and mingle in decent society with most perfect assurance.

There is no crime from murder down that they will not undertake for hoodler, as they feel perfectly safe in escaping conviction.

Every State in the Union has its Bruners.

A Puzzled Editor.

The editor of the Silver State who is striking staunch blows for silver in the Eastern part of Nevada expresses himself as follows on the question of silver and protection:

One thing we don't understand: Why protectionists of American industry refuse to let foreign countries fix our tariff laws, but are perfectly willing to let them dictate to us a gold standard of values.

Another thing we don't understand: Why free traders and tariff reformers want foreign goods to flood our country free or practically free of custom duties, when they refuse to take our silver as money and refuse to let us take it ourselves.

One or two things we do know: We know that our country is big enough and strong enough to paddle its own canoe without any foreign dictation. That if we adopt free coinage we can force Europe to do the same. If the gold-bug powers abroad refuse to come to our terms we can starve them to death in twelve months by suspending trade with them. Let us say to them free coinage or starve. Let the American people run our own Government a while.

If Nevada does not show to the world that it is an out and out silver State this Fall, then the silver men of the West will have made their last rally for the white metal, and the cause we have been so long battling for will meet its Waterloo. Colorado alone cannot make this fight; Nevada, the mother of the silver States must lead her children into the field in November. If Wall street carries the day this time we might as well pull down every hoisting plant in this State and use it for firewood. What use is it to keep our Representatives in Washington fighting for Nevada if the State does not back them up?

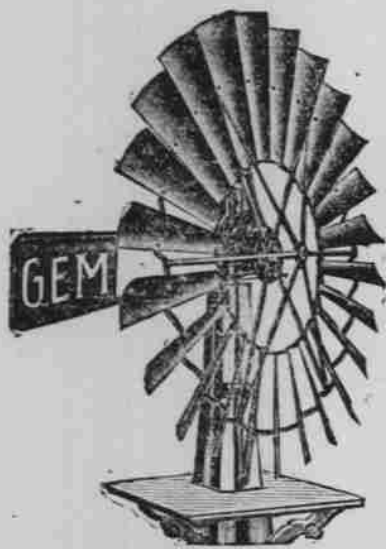

This story, told by Senator Sherman apropos to the refusal of certain Democrats to admit their party is a free silver party, says the Meriden Republican, is very much to the point. An Irishman walking through a cemetery came upon a headstone with the inscription: "I still live." "Be jabbers," said Pat, "if I was dead I'd own up to it."

Many of the leading Republicans of this city are anxious for Ormsby county to form a silver league. The leading Democrats feel the same way. It ought to be done at once.
